

JUNE 7-8-9 2018

IMAGE TRANSFER ON GLASS

During these two days and a half, we will gain notions concerning the transfer techniques of images on glass. Through the use of the kiln we can fuse or thermoform glass and embedded images from photographs, texts and drawings.

TOPICS COVERED

Presentation of works of contemporary artists who adopt image transfer techniques
Use of digital decals and decals DIY on glass
Introduction to screen printing with enamels and glass powders
Printing from a negative film
Experimental techniques
